KEY TO THE PROPERTIES OF OUR PRODUCTS.

W

WOMAN

M

MAN

U

UNISEX

NP

NEW PRODUCT

ND

NEW DESIGN

NC

NEW COLOR

UNISEX

Suitable for both sexes

CUSHIONING

Less impact to the body.

ASIMETRIK

Right and left distinguished garment for better application of benefits to the body.

BIDIRECTIONAL

Structure of bidirectional fabric, freedom of movement.

ESP STRUCTURE

Ergonomic design with a protection system.

SEAMLESS

Ready-made seamless.

REFLECTIVE

High visibility strips.

AIR WAVES COMFORT

Cushioning and comfort with optimized ventilation channels.

ULTRALIGHT

Do not use external materials which may cause friction.

LIGHT WEIGHT

Light clothing.

EXTRA ADJUSTMENT

Maximum adaptability

HIGH PERFORMANCE

Ideal for extreme situations.

DOUBLE HEEL

Specific reinforcement in the heel area.

There are multiple qualities encompassed within our products. To quickly recognize them, we represent them with a series of graphic codes detailed here in a dictionary so that you can easily understand them.

STANDARD FIT

Straight cut

SLIM FIT

Second skin effect/tight

COMPRESSION FIT

Exercises gradual compression

SECOND SKIN

Second skin garments, improved features.

ADAPTABILITY

Fits the body surface

ANTIBACTERIAL

Prevents the entry of and creation of microbes

LOW COMPRESSION

Low compression to the body

MEDIUM COMPRESSION

Medium compression to the body

HIGH COMPRESSION

High compression to the body

ERGONOMIC

Allows use of the garment without discomfort

ADJUSTABLE

Flexible secure fitting

WRINKLE FREE

Avoid annoying wrinkles

REINFORCED

Increased resistance of the garment

FACTOR 50+

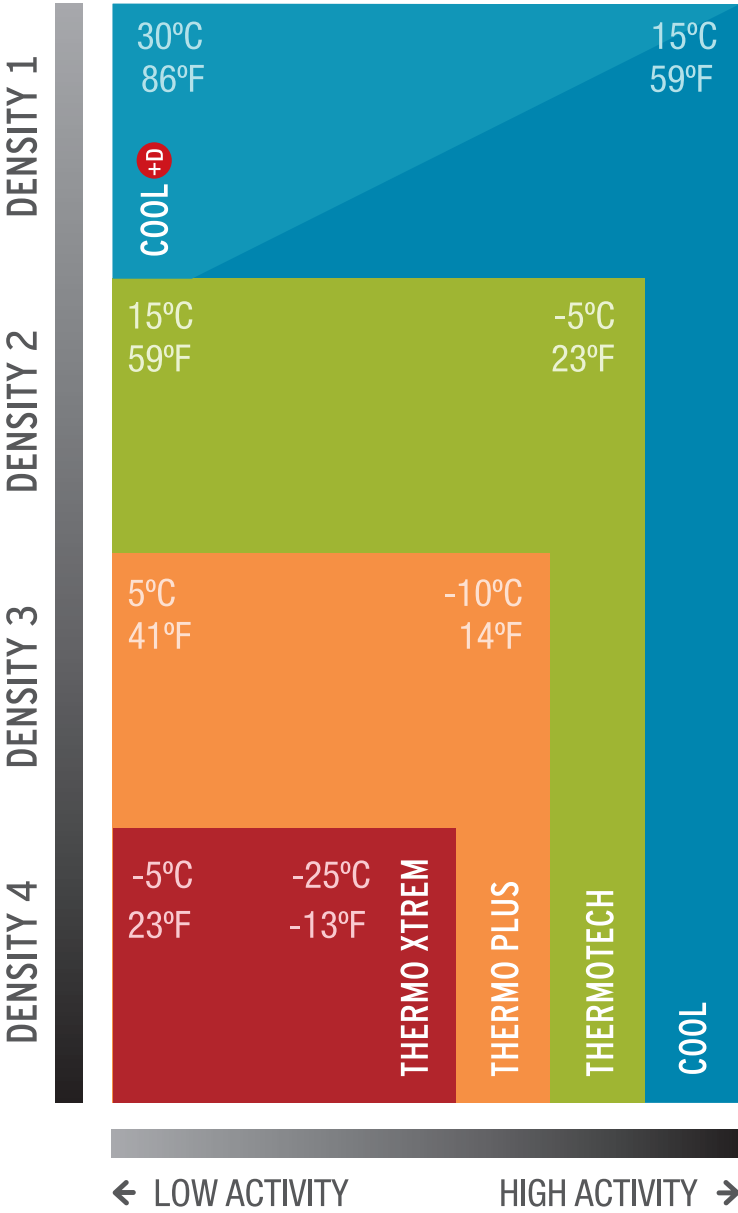

Protects your skin from the sun

BREATHABLE

Repels moisture from the garment

THERMAL REQUIREMENTS.

Lurbel develops each garment bearing in mind the specific environmental conditions of each sport and the needs of the athlete at each moment.

COOL FEEL COOL /FEEL COOL +D

Anti-bacterial, odourless and maximum transpiration properties. A very specific use for sport at high temperatures.

+D (High Density) Denser and thicker structure. The thermal range of use is wider (colder conditions).

TECH FEEL THERMOTECH

Body thermoregulation. Anti-bacterial, odourless and high transpiration properties. A very specific use for sports and different weather conditions.

THERM FEEL THERMO PLUS

Temperature retention. Anti-bacterial, odourless properties and good transpiration. A very specific use for sport at low temperatures.

XTREM FEEL THERMO XTREM

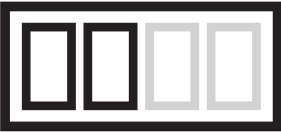

Maximum temperature retention. Bactericide and odourless properties and good transpiration. A very specific use for sport at very low temperatures.

4 DENSITY-RATE SYSTEM.

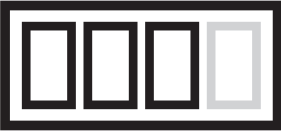

DENSITY 1

Maximum breathability and lightness

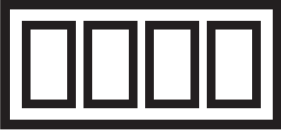

DENSITY 2

Maximum comfort and durability

DENSITY 3

Maximum consistency and performance

DENSITY 4

Maximum protection and thermal insulation

Four density system. A structure for each type of garment. An item of clothing for each sport.

More than 25 years of excellence in textile manufacturing allows us to apply the innovation that is born in our R&D laboratories in sportswear that makes a difference.

With the degree of wisdom and experience of our expert weavers and the latest textile technology in the market, we are able to develop fabrics that maximise the performance of our technologies.

We have therefore defined a new system of 4 different fabric densities, adapting each item of clothing to the nuances required by the environmental condition and physical activity in question. In addition, the said density system allows us to position each item of clothing according to its thermal requirements.

In the world of Lurbel's technical clothing, there's no room for "one for everything".

Your Lurbel garment and your body will work coordinated to meet the demands of your sport of choice at all times to find the right balance that allows you to find the best version of the athlete in you.

PADS.

MTB PERFORMANCE 3 WOMEN.

The concentration of extra padding in the points of greatest pressure provides improved performance even off saddle. Despite being highly protective, this product is extremely lightweight beyond expectation.

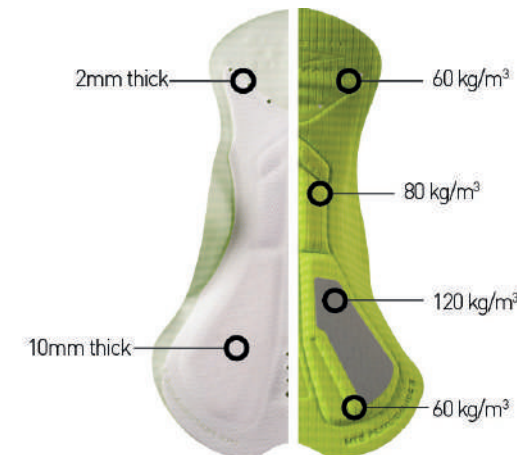

Maximum breathability is enhanced by the combination of perforated foams and plain, soft, elastic fabric wings. Innovative protective inserts guarantee perfect saddle stability in the more demanding stages while the central insert is designed to adapt to the anatomy of the pubic area providing maximum protection and reducing friction.

High density, elasticity, flexibility and reduced thickness come together providing comfort and performance for the ultimate MTB experience.

MTB PERFORMANCE 3 PRODUCTS

FREYA PRO 04A2.889W **AURA PRO** 04A2.892W

MTB PERFORMANCE 3 MEN.

The concentration of extra padding in the points of greatest pressure provides improved performance even off saddle. Despite being highly protective, this product is extremely lightweight beyond expectation.

Maximum breathability is enhanced by the combination of perforated foams and plain, soft, elastic fabric wings. Innovative protective inserts guarantee perfect saddle stability in the more demanding stages while the center channel relieves pressure from the prostate.

High density, elasticity, flexibility and reduced thickness come together providing comfort and performance for the ultimate MTB experience.

MTB PERFORMANCE 3 PRODUCTS

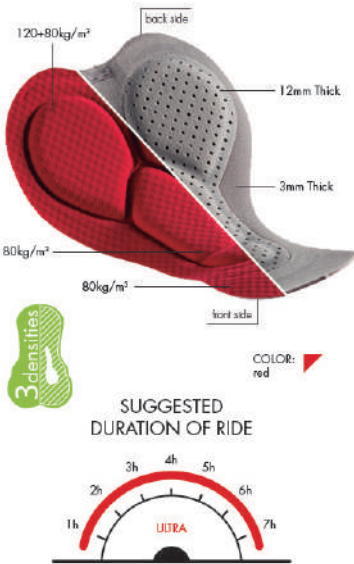

EPIC PRO 04A2.888M **CONQUER PRO** 04B2.810M

PAD HIGH COMFORT W.

PADS EIT CARBONIUM:
The EIT Carbonium fabric is very special: it is made up of three layers, providing an all-way stretch, high breathability and evaporation of perspiration.
At the same time, the EIT Carbonium pads disperse heat, reduce chafing and have bacteriostatic and antistatic properties.

COMPOSITION:
Polyamide 76% - Elastane 20% - Carbonium 4%

High Comfort W Women cycling pad with three layers and placed in the Long Distance category.
It offers a triple density protection thanks to the Carbonium fabric at the upper part with antibacterial properties.
While the all-way stretch fabric reduces chafing, the high density foam concentrated in the major pressure points provides incredible comfort and offer a great fit.

Reference: FXCY666
Length / Width: 310 X 205 mm.

- 1) Specially designed perineal area without bulkiness to provide maximum comfort to the cyclist.
- 2) The pad is made up of three different types of foam densities located strategically to support female anatomy.

PAD ULTRALIGHT.

The ultralight pad Essegiz is extremely comfortable and discreet, with odour control features. It has been developed with an all-way stretch fabric of a slim profile, with antibacterial properties

COMPOSITION:

Nylon · Cotton · Polyester

Back view

Front view

ACTIVE PERFORMANCE

Wick sweat away from your body

Keeps you cool, dry and comfortable

Lightweight, soft and highly breathable

Performance tested and certified by ADVANSA

The ultralight pad combines protection with a slim profile. It is highly breathable and has anti-odour features, which is very important as this pad goes with underwear, in direct contact with the skin. Its features are guaranteed by Coolmax and Sanitized.

- ① Highly breathable 2-way stretch fabric
- ② Quick drying
- ③ Ergonomic areas with high performance foam
- ④ Eliminate odour due to its antibacterial properties
- ⑤ Slim profile to offer maximum discretion

Sanitized® products are sold all over the world and meet the local regulatory standards. Quality and safety are major concerns.

The odour control is very important in garments in direct contact with skin. This feature contributes to the sustainability.
